# Insight AWS Migration Service

Rapid, controlled, secure workload migration from the experts.

Amazon Web Services (AWS) significantly enhances systems agility and resilience. However, migrating workloads to AWS can be time-consuming and expensive for in-house teams.

Insight's AWS Migration service allows you to plan, prepare and execute a secure, cost-optimised and seamless migration to AWS. Our experts will help you migrate your applications and/or data to AWS faster, more securely and with minimal disruption.

on-premise data using storage-based tooling

Business Challenge

AWS cloud brings undoubted business benefits. But without specialist skills and dedicated resources it can be difficult for organisations to accurately estimate the costs, expertise and tools required.

In order to be successful, a migration project needs to include sufficient planning and qualification of workloads to determine the optimal migration method and to identify dependencies and criticality, as well as ensuring that migrated workloads are right-sized and cost optimised.

Assessing these existing workloads and dependencies, however, and planning a fast, efficient migration is resource heavy, and takes key personnel off other business-critical projects.

The Solution

Part of our suite of AWS services, Insight's AWS Migration Service will accelerate your move to the AWS cloud in alignment with the AWS Cloud Adoption Framework (CAF), freeing up internal resources and enabling you to maximise the benefits of the cloud through high degrees of automation, auto-scaling, cross-regional DR and much more.

In line with the AWS Well-Architected Framework, Insight specialists will ensure that the environment is secure before, during and after the migration process. We'll take into account business criticality and any external dependencies, migrating applications with minimal downtime.

We'll also help you optimise costs, including reducing the extensive dual running costs of migration windows by right-sizing workloads as part of the migration process.

Our proven methodology

Insight is an AWS Advanced Consultancy Partner and, delivered by experts, our AWS Migration Service supports AWS native migrations and focuses on four distinct stages.

Our skilled people, expertise, service and support will accelerate your cloud migration with an optimised solution that is specifically tailored to your current and future performance, growth and operational requirements.
